VERGE

AT THE EDGE OF INNOVATION

INTRODUCING
VERGE

Built for efficiency. Built for reliability. Built for success.

Engineered with industry leading technology, Verge products bring global excellence in servers and workstation design to the Australian market.

Created for a range of applications, including:

- PC Workstations
- Directory/management servers
- Access control servers
- Archiver/recording servers
- All in one video solution

The Verge range has been designed and built to support several market-leading VMS platforms. Engineered for high performance, Verge products perform to a level comparable with some of the largest and most well-known names in the industry.

Supported by Dell next day service and business hours phone and email support, Verge products are reliable and well supported across Australia. Specified models also come equipped with dual power supply, ensuring redundancy is catered for.

With a rapidly expanding range, Verge products have a range of optional upgrades and can be customised to match your next project specification.

Available exclusively from GSA Systems, Verge products are at the edge of innovation and available Australia-wide.
